

46. Write a program to find length of string using pointers.

```
#include<stdio.h>

int main(){
    char arr[] = "Hello";
    char *ptr = &arr[0];
    int len = 0;
    while(*ptr != '\0'){
        len++;
        ptr++;
    }
    printf("Length of string : %d", len);
    return 0;
}
```

-----Question 46-----

46. Write a program to find length of string using pointers.

-----Answer-----

executables/46\_string-len-pointer

/home/s4ms3pi0l/Documents/AssignEase/C\_Programs/46\_string-len-pointer.c

Compilation successful.

Length of string : 5

Press the Print Screen button (or press 's' to exit)...
